## DETAILED ACTION

### *Claim Rejections - 35 USC § 103*

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1, 2, and 5 are rejected under 35 U.S.C. 103(a) as being unpatentable over Eglit (5796392).

Regarding to claims 1 and 5, Eglit discloses an analog interface and a method for generating a digital display signal from an analog signal that is limited to a multiple discrete analog levels and from a synchronization signal that defines spatial order for the digital display signal (col. 2, lines 7-56; col. 4, lines 4-19), the method comprising the step of: in response to a sample clock, sampling the analog signal to provide analog samples (col. 4, lines 4-19); quantizing the analog samples to provide an M-bit digital display signal (see col. 12, claim 8); and adjusting at least one of the frequency (420, Fig. 4) and phase (430, Fig. 4) of the sample clock to substantially restrict the codes of the M-bit digital display signal. Eglit does not explicitly disclose the multiple discrete analog levels is equal to  $2^N$ . However, since it is well known in the art that the multiple discrete analog levels is represented by  $2^N$ , it would have been obvious to one of ordinary skill in the art that Eglit's multiple discrete analog levels is equal to  $2^N$ .

Regarding to claim 2, Eglit further discloses generating the sample clock in response to the synchronization signal (col. 2, lines 7-56; col. 4, lines 4-19).

***Allowable Subject Matter***

3. Claims 3-4 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

4. Claims 6-13 are allowed.

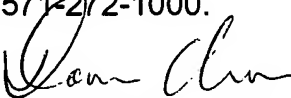

***Conclusion***
